

OLSENBEAL

Windmill Erectors

“Professionals working for professionals”

(See reverse side)

OLSENBEAL – EXPERIENCE THAT COUNTS!

OLSENBEAL specializes in WTG installation including tower, nacelle, and rotor erection. Our roots in the wind turbine installation industry began in 1999 with a small project in Wyoming for SeaWest (now AES). Since that time, we have erected over 1,200MW of WTGs.

OLSENBEAL owns several large capacity crawler cranes including Kobelco SL6000 (600-ton capacity) crawler. This crane will set all current large output wind turbine generators.

Windmill Erecting Experience

(this is not a complete project listing)

GE 1.5 MW turbines:

- Highmore, SD (**27 WTGs**), Lamar/Springfield, CO (**5 WTGs**)
- Sweetwater Phase II – Sweetwater, TX (**61 WTGs**)
- High Plains/McFadden Wind Projects – McFadden, WY (**85 WTGs**)

MHI Turbines –

- 600 kW – Foote Creek Phases 3 & 4 – Arlington, WY (**28 WTGs**), Condon Phases 1 & 2 – Condon, OR (**83 WTGs**), Mountain View I / II – Palm Springs, CA (**111 WTGs**)
- 1MW –Rock River, WY (**50 WTGs**), Caprock Wind Farm – Tucumcari, NM (**60 WTGs**)

Nordex 1.3MW

- Mandan, ND (**2 WTGs**)

Vestas Turbines

- V47 – Stateline Ph2 – Wallula, WA (**55 WTGs**), Mtn. View 3 – Palm Springs, CA (**34 WTGs**)
- V80 – Evanston, WY – (**80 WTGs**), Hopkins Ridge – Dayton, WA (**83 WTGs**)
- V82 – Ainsworth, NE (**36 WTGs**)

Suzlon S88 Turbines

- Mountain Wind Phases 1 & 2 – Fort Bridger, WY (**67 WTGs**),
- Mountain Home, ID (**20 WTGs**) / Cassia, Idaho (**14 WTGs**)

Clipper C96 Turbines

- Flatridge Wind – Nashville, Kansas (**40 WTGs**)

OLSENBEAL is an experienced steel erector and have been erecting for heavy steel / heavy rigging projects since 1987. We are an Advanced Certified Steel Erector with AISC. If you are searching for an experienced WTG installer, look no further. We have the expertise, equipment and trained teams that will make your project a success. Contact us today and let us help your project succeed.
